Profile

A passionate fullstack web developer skilled in React but also adept at learning new languages and proficient in Agile methodologies. Additionally, bringing extensive experience as a former regional manager overseeing hardware repair operations.

Education

Lunds University

5 year Computer Science (2nd year ongoing).

Polhemskolan, Lund

3 year Technical/Natural Science Education, graduated with 20.0 including merit points.

Employment History

Software developer, T2 Data, Stockholm

2022 - 2024

Optimized React web application performance with code-splitting and using different build-methods. I contributed to shaping and developing Maia, a DevOps program, by actively participating in daily meetings and collaborating on software development tasks.

Site manager/Technician, Repaircare AB, Lund

Jan 2020 - Oct 2022

Troubleshooting and repairing phones, iPads, computers, and other devices (Mostly hardware but also some software). Responsibilities also include accounting, recruitment, training of new employees, cash management, customer relations, procurement of components, case management, marketing, dialogue with major clients (Lunds kommun, Axis), and more.

Student ambassador, Gerdahallen, Lund

2019 - 2020

Maintaining contact with all student associations, unions, and nations in Lund. Organizing training sessions for large groups and other events. Marketing through email, social media, and other activities.

Poll official, Valmyndigheten, Lund

Sep 2018 and May 2019

Handling large crowds, guiding them through the voting process, counting/packaging votes, managing materials, ensuring safety, and minimizing conflict risks.

Summer job - Software developer, T2 Data, Stockholm

Jun 2018 - Aug 2018

Testing and development of Maia (DevOps system) written in languages such as Ruby on Rails, Java and more.

Summer job - Software developer, T2 Data, Stockholm

Jun 2017 - Aug 2017

Testing and development of Maia (DevOps system) written in languages such as Ruby on Rails, Java and more.

Part time - Cashier/Packer/Staff, Peter Beier, Malmö

2017

Sales of chocolate, customer service, packaging, inventory management, order reception, and premises cleaning.

Summer job - Software developer, T2 Data, Stockholm

Jun 2016 - Aug 2016

Testing and development of Maia (DevOps system) written in languages such as Ruby on Rails, Java and more.

Summer job - Software developer, T2 Data, Stockholm

Jun 2015 - Aug 2015

Syntax testing with Rubocop and development of Maia (DevOps system) written in languages such as Ruby on Rails, Java and more.

Summer job - Software developer, T2 Data, Stockholm

Jun 2014 - Aug 2014

Development of a Java application that utilized the same software as the previous year to send stress-testing data to a recipient. Data included temperature and light intensity from third-party hardware.

Volunteer, Helsingborgsfestivalen, Helsingborg

Jul 2013

Acted as a security guard, including welcoming artists to their lounge, managing the audience in front of the stage, conducting preventive work/analysis for general security, and managing access control in various areas.

Summer job - Software developer, T2 Data, Stockholm

Jun 2013 - Jul 2013

Development of an iOS application that utilized software from T2 Data to transmit information over a network in the form of objects.

Extra staff, Elgiganten megastore, Malmö

Nov 2012

Receiving customers, managing queues, transporting customers' goods to their cars.

Summer job - Software developer, T2 Data, Stockholm

Jun 2012 - Aug 2012

Development of iOS applications.
